SUMMARY

Detail-oriented Backend Developer specializing in Python and Golang, skilled in document energy development, SQL-driven backend logic, and automation. Delivers clean, maintainable code while supporting production workflows and resolving technical issues. Knowledgeable in REST concepts, microservices, and backend design principles, fostering collaboration across cross-functional teams.

SKILLS

Programming Languages

- **Golang (Foundational – Backend Services, Concurrency Basics)**
- **Python (Automation, Backend Logic, Data Processing)**

Backend & Integration

- RESTful API concepts
- Microservice-oriented design principles
- Backend data integrations
- Modular & reusable code development

Databases

- SQL (MySQL) — performance-optimized queries, joins, aggregations, window functions

Tools & Platforms

- SmartComm
- Git, GitHub
- Docker (basic containerization understanding)

Core Engineering Skills

- Clean & maintainable code
- Scalable application design fundamentals
- Debugging & production issue resolution
- Secure handling of sensitive data

EXPERIENCE

DELOITTE
Hyderabad

Analyst Trainee

09/2025 to Current

- Developed **backend document-processing logic** using **Python** to transform, validate, and structure high-volume enterprise data for production systems.
- Built and optimized **SQL queries** (joins, aggregations, window functions) to support backend data workflows and ensure **high data accuracy and performance**.
- Worked extensively with **SmartComm** for **document composition, template logic, and data-driven content generation**, integrating backend data sources into scalable document pipelines.
- Designed **reusable Python modules** for automation, validation, and backend integration, improving processing efficiency and reducing manual intervention.
- Applied **backend design principles** such as separation of concerns, modularity, and maintainability while handling sensitive business data.
- Supported **production delivery** by troubleshooting technical issues, resolving data inconsistencies, and ensuring timely completion of assigned tasks.
- Collaborated with **cross-functional teams** (developers, analysts, and stakeholders) to understand requirements and deliver step-by-step outputs aligned with scope and timelines.
- Demonstrated **ownership and accountability** by independently handling deliverables and ensuring adherence to confidentiality and compliance standards.

Environment: Python, SQL, SmartComm, Git, Data Pipelines, Backend Integrations

EDUCATION AND TRAINING

BACHELOR OF TECHNOLOGY: COMPUTER SCIENCE & ENGINEERING (AI & ML)

05/2025

Kalasalingam Academy of Research And Education, Madurai

CGPA-8.84

Academic Projects:

- **Smart Agriculture Management System** – using **Python & SQL** for analyzing soil, weather, and crop data.
- **Crop Recommendation System** – Developed Python-based recommendation logic with **SQL-backed data integration**.
